THINK SPORTS... GO SPORTZ

# GoSportz' Safe Pack Tools

GoSportz offers a range of hygiene maintenance tools

- ❑ Footwear Disinfection
- ❑ UV Disinfection
- ❑ Ozone Air Sterilizers

# 1. Footwear Disinfection

Footwear picks up more than 400,000 types of bacteria, viruses and organisms from floors. You cant control where your clients have been before they enter your facility. Once they enter through your doors, ensure that their footwear is properly disinfected.

Footwear Sanitizer

Walk through Footwear Sanitizer

Our footwear disinfection mats are designed to eliminate bacteria and viruses; it's effective, easy to use and can be placed anywhere

## 2. UV Disinfection

We have designed a range of UV Disinfection Solutions that deliver a powerful dose of 254 nm Ultraviolet Germicidal Radiation for a 5.0 Log(10) disinfection. Our product range enables your cleaning staff to disinfect Air, Flooring and Surface without the limitations of chemical cleaning. Quick and efficient microbial deactivation ensures a scalable disinfection protocol that is assured to mitigate the risk of disease transmission at your workplace.

### Large Area Sanitizer

Chemical wiping of every surface is time consuming and prone to human error. Indoor air fumigation is not healthy.

The Large Area Sanitizer helps disinfect Air, Floor & Surfaces in one go.

### Floor Disinfector

Floors need disinfection multiple times a day.

Chemical cleaning needs evacuation & ventilation.

This equipment allows the cleaning process to be carried out without disruption of regular activities.

### Surface Sterilizer

High touch surfaces like door handles, gym equipment, tables etc. need to be disinfected on a constant basis. Chemical cleaning needs 10 minutes of contact with surface for thorough disinfection.

The surface sterilizer disinfects instantly and mitigates disease transmission.

# 3. Ozone Air Sterilizers

*How Ozone works in Air Sterilization?*

Ozone is about 3500 times a more potent oxidant than Oxygen. Hence even in small & harmless levels it kills all the anaerobic pathogens including Covid-19.

## Benefits of Ozone Air Sterilization

- Eliminates Viruses & Bacterial contamination
- Eliminates foul odor (perfect for Gymnasiums)
- Eliminates smell from smoke
- Ozone fumigation saves recurring chemical cost
- Easy to operate and reduces human involvement in the disinfection process

**GoSportz also offers a range of high performance and durable surfaces viz. Glass and Polyurethane seamless surfaces which are hygienic and easy to clean.**

**Rental options available. (For selected machines subject to terms & conditions)**

**Please contact our GoSportz Sales Team for further details.**
